**EXPERTS FOR MAXIMUM SENSING.
JOIN THE LEADER!**

Head (m/f/d) of TPM and Facility Management

About YAGEO Nexensos

We are the experts for reliable temperature sensors, even at extreme temperatures and in demanding applications. As the global market leader for platinum thin-film technologies, we offer sensor elements and assemblies with the highest quality standards from -200 °C to +1,000 °C. We enable reliable and sustainable applications and thus make an important contribution to key issues of our time, such as clean air, energy efficiency and resource conservation. We support our customers from rapid prototyping to large-scale production and with constantly adapted production capacities in Europe and Asia.

What you can expect:

- In your role as "Head of TPM and Facility Management (m/f/d)", you will be responsible for the technical and disciplinary management of the Facility Management & TPM department (management of currently 9 employees with technician, electrician, mechatronics engineer and industrial mechanic qualifications).
- You are responsible for ensuring the standard-compliant operation and constant availability of production-related technical building equipment and for the associated statutory testing and inspection obligations.
- You will also be responsible for the further development of maintenance processes and SAP-supported spare part management with regard to training shift personnel, risk management for systems and preventive maintenance.
- You will be the Dangerous Goods Safety Advisor for technical gases and will be responsible for planning and implementing optimizations and energy savings in the area of infrastructure as well as setting up and maintaining an energy management system.
- You will also be responsible for advancing the central infrastructure documentation as well as the preparation, support and implementation of technical tendering procedures.
- You will be responsible for contractor management and construction site management and act as technical support for production in compliance, energy and environmental issues.
- You will be the central point of contact for the site operator (Heraeus Site Operations) for all building and site issues as well as for rental contract management and form the bridge to the facility management of Heraeus Site Operations.

Your Profile:

- Relevant master craftsman / technician training or technical studies
- Several years of professional experience in maintenance or technical service
- Ideally qualified trainer for mechatronics engineers
- Lean Six Sigma Greenbelt desirable
- At least 5 years of management experience is an advantage
- Ability to work in a team and strong communication skills
- Good knowledge of English
